

DBdeployer: Bringing the project back to life in 2026

Roberto de Bem

Database Engineer – Percona

Agenda

Agenda

01 About me

02 What is DBdeployer?

03 Why I decided to maintain?

04 Challenges of adopting an open-source tool

05 Basic usage

06 New features

07 Live Demo

08 Future of the Project and Contributions!

Disclaimer

ProxySQL DBdeployer

This talk was thought out and sent before the publication of the ProxySQL Dbdeployer maintenance announcement.

About me

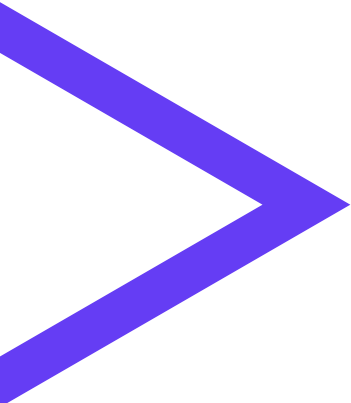

About me

- Database Engineer at Percona
- Working with databases for the last 7 years
- Bachelor's Degree in Information Systems
- Oracle ACE Apprentice
- Based in Brazil

What is DBdeployer?

7

What is DBdeployer?

DBdeployer is an open-source command-line tool for quickly creating MySQL and its forks, with different architectures, easily.

It was originally created by Giuseppe Maxia as a replacement for MySQL Sandbox.

**Why I
decided to
maintain?**

Why I decided to maintain?

- Replication from 8.0 to 8.4

Why I decided to maintain?

- Replication from 8.0 to 8.4
- Percona Support tickets with MySQL 8.4

Why I decided to maintain?

- Replication from 8.0 to 8.4
- Percona Support tickets with MySQL 8.4
- The desire to help the open-source community

Challenges of adopting an open-source tool

Challenges of adopting an open-source tool

- Unfamiliar codebase

Challenges of adopting an open-source tool

- Unfamiliar codebase
- Return to coding

Challenges of adopting an open-source tool

- Unfamiliar codebase
- Return to coding
- AI adoption

Challenges of adopting an open-source tool

- Unfamiliar codebase
- Return to coding
- AI adoption

InnoDB Cluster implementation with limited AI support

ClusterSet implementation completed primarily with AI assistance

Basic Usage

18

Basic Usage

\$ dbdeployer init

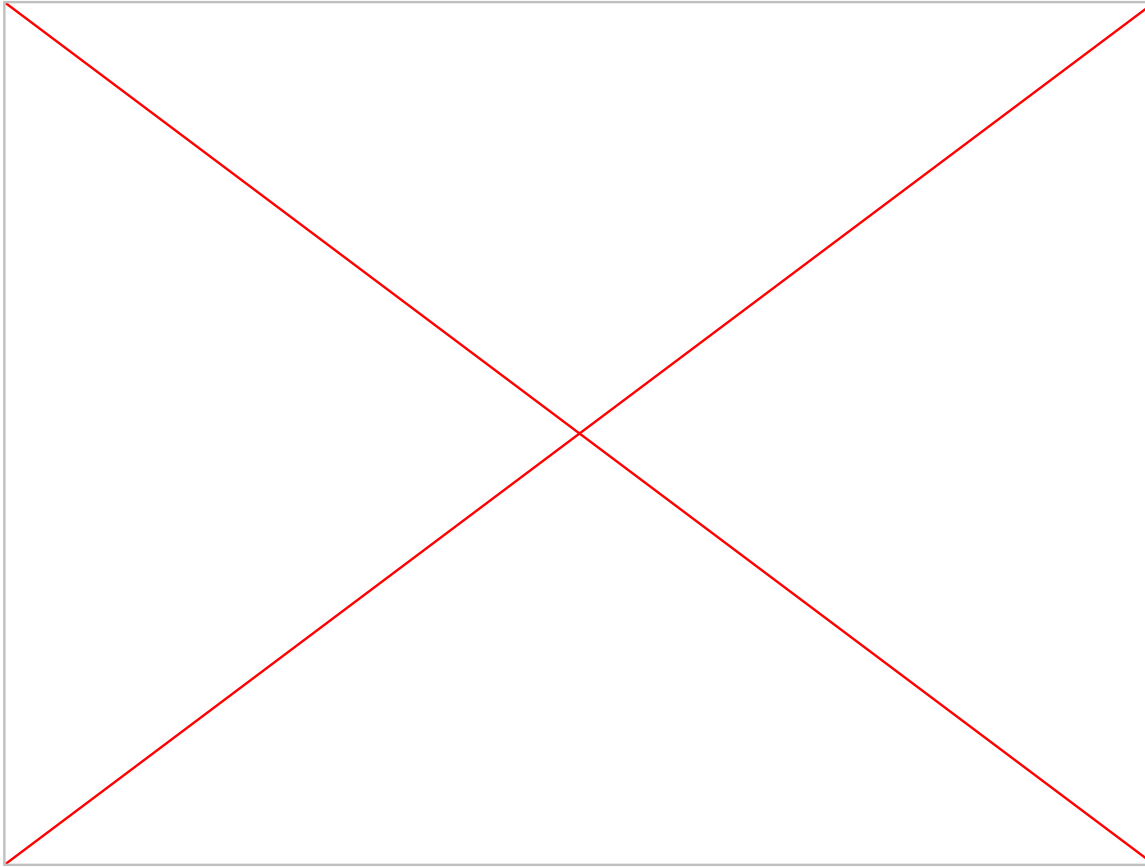

- **Create the sandbox binary folder (\$HOME/opt/mysql)**
- **Create the sandbox home directory (\$HOME/sandboxes)**
- **Enable the bash completion**
- **Download MySQL binary**

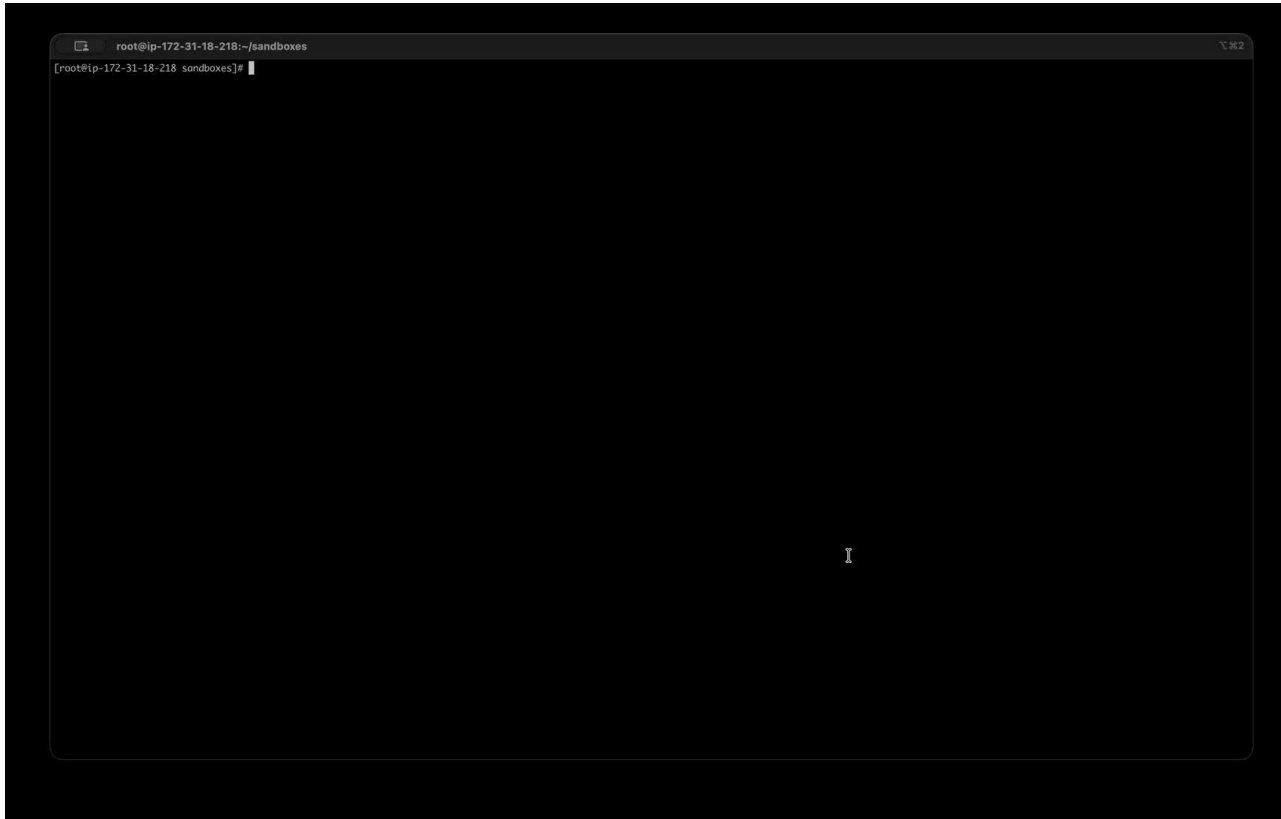

▶ Basic Usage

\$ dbdeployer deploy

- **Deploys different sandboxes in different architectures**
 - **Single**
 - **Replication**
 - **Multiple**
- **Multiple options per kind**
 - **Port/Base-port**
 - **Flavor**
 - **Gtid**
 - **Topology**

Demo

**New
features**

New Features

VillageSQL

```
$ dbdeployer deploy single 0.0.3
```

▶ New Features

InnoDB Cluster

```
$ dbdeployer deploy replication --topology=innodb-cluster 8.4.8
```

InnoDB Cluster with MySQL Router

```
$ dbdeployer deploy replication --topology=innodb-cluster --mysql-router  
8.4.8
```

Optional

```
--mysqlsh-path = /path/to/mysql-shell
```

```
--mysql-router = /path/to/mysql-router
```

▶ New Features

InnoDB Cluster Set

```
$ dbdeployer deploy replication --topology=cluster-set 8.4.8
```

InnoDB Cluster Set with MySQL Router

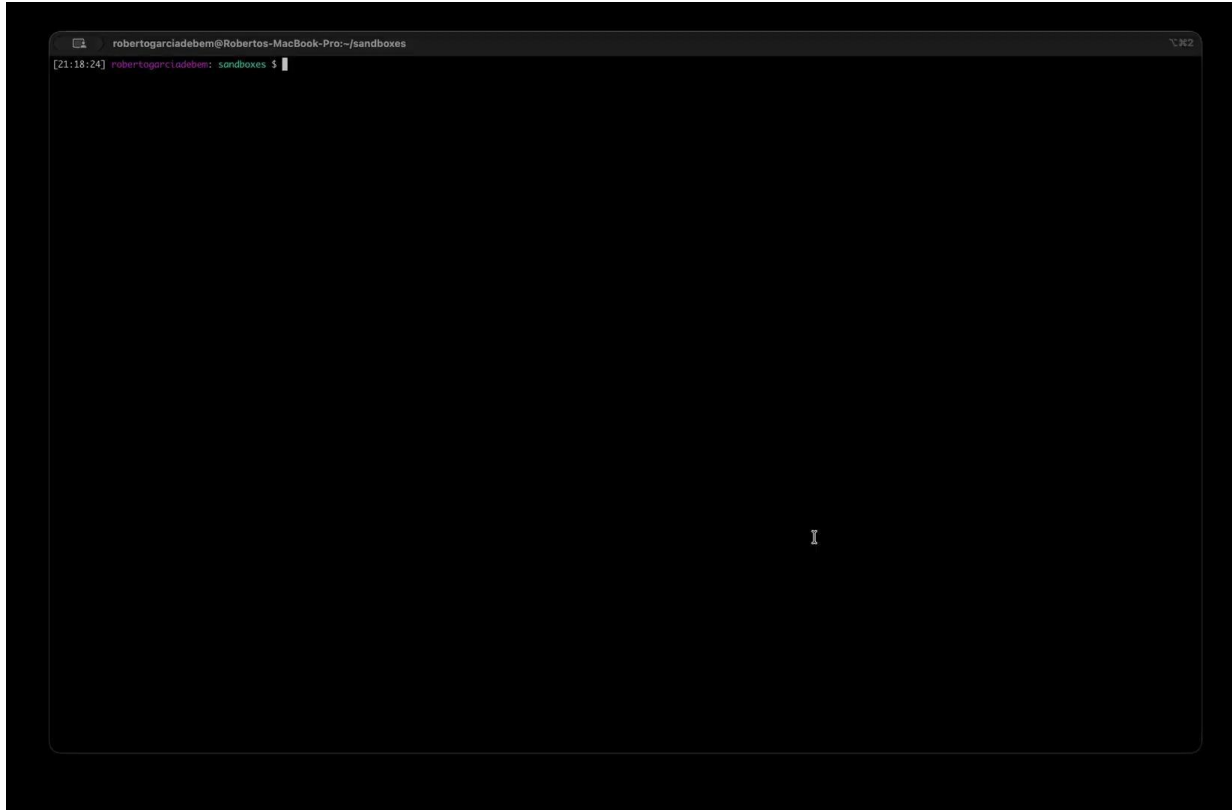

```
$ dbdeployer deploy replication --topology=cluster-set --mysql-router 8.4.8
```

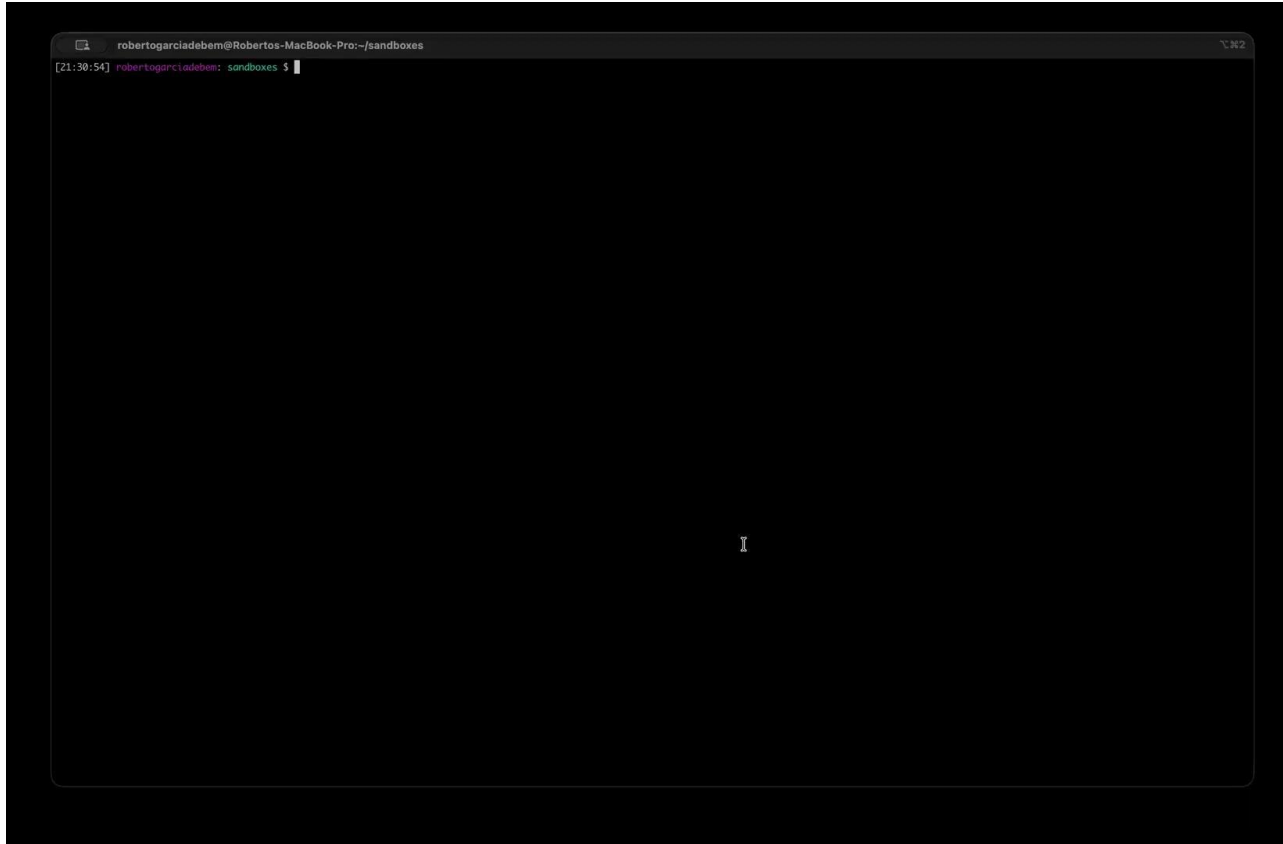

Optional

```
--mysqlsh-path = /path/to/mysql-shell
```

```
--mysql-router = /path/to/mysql-router
```

Demo

▶ Basic Usage

\$ dbdeployer global

- **Execute the commands on all sandboxes (exec, status, stop, start)**
- **Can be filtered by version(8.0.45), short version(8.0), flavor (percona), etc.**

▶ Basic Usage

\$ dbdeployer downloads

- **Download and Unpack the tarball based on the JSON tarball list file.
(\$HOME/.dbdeployer/sandboxes.json)**
- **Adds/list/show the tarballs from JSON file.**

Basic Usage

\$ dbdeployer admin

- **Lock and Unlock the deletion of some sandbox**
- **Show the capabilities of a flavor and version**
- **Upgrade sandbox**

**Future of the
Project and
Contributions!**

Future of the Project and Contributions!

- ProxySQL became the official maintainer of the project.
- Github: [dbdeployer/dbdeployer](https://github.com/dbdeployer/dbdeployer)
- Docker support: [Anydbver zelmario/anydbver](https://github.com/Anydbver/zelmario/anydbver)

A mountain goat with white fur and small horns stands on a dark, rocky outcrop. The background is a vast, rugged mountain range with snow-dusted peaks under a clear, deep blue sky. The scene is illuminated by warm, low-angle light, likely from the setting or rising sun, creating a dramatic and serene atmosphere.

THANK YOU
